Experiment 6

Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>Login Page</title>
</head>
<body>
  <h2>Login Form</h2>
  <form action="login" method="post">
    Username: <input type="text" name="username" required><br><br>
    Password: <input type="password" name="password" required><br><br>
    <input type="submit" value="Login">
  </form>
</body>
</html>
```

```
login.html LoginServlet.j X DashboardServlet.jav LogoutServlet.java web.xml

File Edit View

import java.io.*;
import javax.servlet.*;
import javax.servlet.http.*;

public class LoginServlet extends HttpServlet {

    protected void doPost(HttpServletRequest request, HttpServletResponse response)
        throws ServletException, IOException {

        String username = request.getParameter("username");
        String password = request.getParameter("password");

        response.setContentType("text/html");
        PrintWriter out = response.getWriter();

        if (username.equals("admin") && password.equals("1234")) {

            HttpSession session = request.getSession();
            session.setAttribute("username", username);
            session.setMaxInactiveInterval(60);

            response.sendRedirect("dashboard");
        } else {
            out.println("<h3>Invalid Credentials</h3>");
            out.println("<a href='login.html'>Try Again</a>");
        }
    }
}
```

The image shows a screenshot of an IDE with a dark theme. The top bar displays four open files: login.html, LoginServlet.java, DashboardServlet.java (which is the active file), LogoutServlet.java, and web.xml. Below the file bar is a menu with 'File', 'Edit', and 'View' options. The main editor area contains the following Java code:

```
import java.io.*;
import javax.servlet.*;
import javax.servlet.http.*;

public class DashboardServlet extends HttpServlet {

    protected void doGet(HttpServletRequest request, HttpServletResponse response)
        throws ServletException, IOException {

        HttpSession session = request.getSession(false);
        response.setContentType("text/html");
        PrintWriter out = response.getWriter();

        if (session != null && session.getAttribute("username") != null) {
            String user = (String) session.getAttribute("username");

            out.println("<h2>Welcome " + user + "</h2>");
            out.println("<a href='logout'>Logout</a>");
        } else {
            response.sendRedirect("login.html");
        }
    }
}
```

The image shows a screenshot of an IDE with a dark theme. The top bar contains several tabs: 'login.html', 'LoginServlet.java', 'DashboardServlet.java', 'LogoutServlet.java' (which is the active tab), and 'web.xml'. Below the tabs is a menu bar with 'File', 'Edit', and 'View'. The main editor area displays the following Java code:

```
import java.io.*;
import javax.servlet.*;
import javax.servlet.http.*;

public class LogoutServlet extends HttpServlet {

    protected void doGet(HttpServletRequest request, HttpServletResponse response)
        throws ServletException, IOException {

        HttpSession session = request.getSession(false);

        if (session != null) {
            session.invalidate();
        }

        response.sendRedirect("login.html");
    }
}
```

```
<web-app xmlns="http://xmlns.jcp.org/xml/ns/javaee"
    version="3.1">

    <servlet>
        <servlet-name>LoginServlet</servlet-name>
        <servlet-class>LoginServlet</servlet-class>
    </servlet>

    <servlet-mapping>
        <servlet-name>LoginServlet</servlet-name>
        <url-pattern>/login</url-pattern>
    </servlet-mapping>

    <servlet>
        <servlet-name>DashboardServlet</servlet-name>
        <servlet-class>DashboardServlet</servlet-class>
    </servlet>

    <servlet-mapping>
        <servlet-name>DashboardServlet</servlet-name>
        <url-pattern>/dashboard</url-pattern>
    </servlet-mapping>

    <servlet>
        <servlet-name>LogoutServlet</servlet-name>
        <servlet-class>LogoutServlet</servlet-class>
    </servlet>

</web-app>
```

Output:
